

Palsgaard® 5301

Product Profile

- Product type:** Mixture of vegetable hydrocolloids.
- Application areas:** Stabilizer/thickening agent for dressings with and without oil.
- Process requirements:** Palsgaard® 5301 need to be mixed with oil in the ratio 1:3 when added into the water phase.
- Functional properties:** Palsgaard® 5301 provides the following advantages:
- * Stabilizes the emulsion in dressings with oil.
 - * Thickens the water phase, so that the herbs are kept floating in the dressing.
 - * Ensures a fine consistency - stable under acid conditions down to pH around 3.0.
- Dosage:** 0.55-0.65%, calculated on the water phase, and depending on the viscosity required.
